Maximize Your Machine!

FieldMaster®
Multi-Season Series
Agricultural Rubber Tracks

www.mclareniindustries.com
McLaren Industries has invested years in R&D to create the highest quality rubber compounds and track designs. Our continuous improvement has led us to the development of FieldMaster Multi-Season Series agricultural rubber tracks, the latest chapter in rubber track manufacturing.
McLaren invests relentlessly in innovation, giving you direct access to the latest in rubber track design and manufacturing!

**WHAT MAKES A FIELDMASTER**

**SpoolRite Belting Technology™**
Exclusively designed by McLaren, SpoolRite Belting is vastly superior to alternative overlapping or standard continuous cable track systems. It utilizes pre-stressed and aligned non-overlapping continuous belting system to guarantee equal tension throughout the track belts and increase tensile strength.

**Four-Step Metal-to-Rubber Bonding**
The enhanced bond between the forged links and the rubber track reduces corrosion between the forgings and the rubber in wet environment. The higher bonding strength also prevents link ejection even under extreme stress and heavy loads.

**Extra Large-Diameter Cables**
With up to 2x times the tensile strength of the standard rubber tracks, this unique for the industry feature prevents track breakage under extreme shock loads and maximizes the full potential of the machine’s power.

**EWF System™**
Extra-Wide Forgings System provides a wider steel belting for increased track strength and stability.

**HRAT Compound™**
High-Performance Rolling Area Track compound designed to carry the full load of the machine at full capacity.

**5-RT Compound™**
Specially designed for harvesters, with longer lasting tear and cut resistant material. It features greater UV protection to prevent cracking.

Gain the McLaren Advantage

McLaren Industries, Inc. is one of the world’s leaders in the design and manufacture of steel tracks, rubber tracks, rubber pads, solid cushion tires, and undercarriage parts for a wide range of construction machines, carrier vehicles, and agricultural equipment. McLaren’s commitment to quality manufacturing is appreciated by a continuously growing list of OEM customers worldwide. To learn more about McLaren’s product lines, please visit us online at www.mclarenindustries.com.
