McLaren Introduces Nu-Air AT - an ALL TERRAIN Tire for Skid Steers Loaders and Backhoes.

McLaren Industries is pleased to announce the introduction of Nu-Air AT™ - a new flat-proof tire.

The Nu-Air AT is designed for any terrain, but it is particularly good on hard surfaces such as asphalt and pavement. The tread pattern is designed to make more contact with the surface, thus reducing ground pressure and extending the life of the tire. Since it incorporates the same technology as the original off-road Nu-Air Tyre, the Nu-Air AT is "flat-proof" and designed to ride much like a pneumatic tire.Air AT is part of the Nu-Air Tyre Series product line, featuring the same innovative Semi-Pneumatic Tire Technology™.

The Nu-Air AT is designed to last on average 3 to 5 times longer than standard pneumatic skid steer tires and even longer on hard surfaces. With any Nu-Air tire, you get a smooth air-cushioned ride and zero downtime from flats.

McLaren gives you more! Whether you need tires or tracks for your skid steer loader or a set of flat-proof backhoe tires, or rubber tracks for your mini excavator, McLaren will provide you with outstanding products and service.
