Nu-Air Tires on Case 1840 in Denmark scrap yard

We are very satisfied from the fact that the Nu-Air tires lasted 7 months on our CASE 1840 working in a scrap yard.

It is hard to say how long the old tires lasted because this skid steer was recently added to our fleet. Before switching to McLaren tires we used pneumatic tires which were losing air every day. We filled them with expensive foam and lasted 14 days (approx. 8 work hours per day) before one of the tire was completely destroyed.

Our other Case 1825 was equipped with foam filled tires that lasted 4-5 months. The McLaren tires lasted 3-4 months longer while working in the recycling scrap yard.
