Product Spotlight for Heavy Duty Versatility: McLaren Over-the-Tire Tracks

McLaren Industries Over-the-Tire (OTT) tracks get the spotlight in Landscape Contractor Magazine's October 2018 Issue Vol 21 no.10 article "Gaining Traction: A Comparison Between Tracks and Tires". Not only does McLaren provide the greatest variety of tread pattern for both heavy duty industrial tires and tracks, they have a solution that incorporates both - OTTs.

McLaren over-the-tire tracks are easy to attach to your skid steer, simply drive over them and secure. McLaren OTTs come are either full steel or a combination of rubber and steel and come in a range of patterns to meet your jobsite needs.

Rubber OTT

Most Versatile. High grade rubber pads over fortified steel. Excellent performance and protection for your tires, both on-road and off.

*Non-marking rubber available

Magnum OTT

Heaviest Duty. All-steel shoes with directional tread design over rubber pads for better traction in loose ground conditions and improved floatation for operator comfort.

Diamond OTT

Heaviest Duty. All-steel shoes with directional tread design over rubber pads for better traction in loose ground conditions and improved floatation for operator comfort.

Maximizer OTT

Lowest price point. A lighter version of the Diamond OTT.
