McLaren Industries' Rubber Factory in Thailand Attains ISO 9001:2008 Certification

The global manufacturer of rubber tracks and tires demonstrates the highest levels of service quality and adheres to the ISO 9001:2008 principles, the most recent ISO standard for internationally recognized quality management principles.

McLaren Industries, a global leader in rubber tracks manufacturing and distribution, is pleased to announce that its manufacturing facility in Thailand has achieved ISO 9001:2008 for the Design and Manufacture of Rubber Tracks and Rubber Pads. This highly coveted certification is a testament to the company's dedication to production quality and total customer satisfaction, and it demonstrates a commitment to continuously improve its quality management systems.

To conduct the certification process, McLaren Industries turned to SGS SA, Switzerland, which is the world's largest independent testing, inspection, analysis and certification company. To achieve the certification, the factory has demonstrated compliance with the newest standards for quality management systems set forth by the International Organization for Standardization (ISO). For McLaren this achievement represents another chapter in the success story of the company. McLaren's customers in the various industrial segments can now feel even more confident in the company's quality management processes.

McLaren Industries, a privately owned US company founded in 1997, is widely recognized as a high quality manufacturer of OEM and aftermarket rubber tracks, over-the-tire tracks and semi-pneumatic tires, skid steer tires for a broad range of construction machines, carrier vehicles, and agricultural equipment.
